

Corrigendum

Corrigendum to “Sphingosine-1-phosphate promotes barrier-stabilizing effects in human microvascular endothelial cells via AMPK-dependent mechanisms” [Biochim. Biophys. Acta Mol. Basis Dis. 2019 Apr 1;1865(4):774–781]

The authors regret to inform that incorrect concentrations of the individual components of the inflammatory stimulus were reported in the original article's Supplementary Table 1.

The corrected Supplementary Table 1 reads as follows:

Component	Species	Company	Solvent	Concentration
LPS	<i>Escherichia coli</i> O111:B4	Sigma Aldrich	PBS (Biochrome), DMEM	10 µg/ml
TNF-α	Human	Peptrotech	Ampuwa® (Fresenius Kabi)	5 µg/ml
IL-1β	Human	Peptrotech	PBS + 0,1% BSA	1 µg/ml
IFN-γ	Human	Peptrotech	PBS + 0,1% BSA	1 µg/ml

IL-6 Human Peptrotech PBS + 0,1% BSA 1 µg/ml

Accordingly, the first sentence in the Material and methods section 2.2 needs to read “Inflammatory conditions were simulated using an inflammatory stimulus (LPS + Cyt) containing the endotoxin lipopolysaccharide (LPS, 10 µg/ml, see Suppl. Table 1) and the pro-inflammatory cytokines TNF-α (5 µg/ml), IL-1β (1 µg/ml), IFN-γ (1 µg/ml) and IL-6 (1 µg/ml).”

It can be genuinely assured that this mistake does not affect the scientific conclusions drawn in the original article.

The authors would like to apologise for any inconvenience caused.
